country is prosperous under our financial system as it is, and we know of no good reason why that system should now be disturbed.

R solved, That the persistent efforts of the free-traders to destroy our tariff by plecemeal by legislation to repeal the duties on special articles admonsines us of the necessity of adhering more strongly than ever to the tariff policy of the past twenty years, which has built up our grand system of manufactures, fostered the revenues of the government and promoted our national prosperity. The business of the country will not bear this tinkering of the tariff, and if any revision to that tariff is to be made at all it should be done through a commission of capable men after a patient and thorough hearing of all parties to the interests involved.
